<b>Price:</b>	<b>4.165,29 €</b> <b>(nett:3.500,24 €)</b>

### Product description

This set of 20-inch "Offroad Design" summer wheels for the Porsche Taycan offers a perfect combination of style and performance. The rims, measuring 9J x 20 ET54 and 11J x 20 ET60, have been specially developed for the Taycan to ensure an optimal fit and excellent driving characteristics. They are made from high-quality materials that guarantee both durability and an attractive appearance. The wheels are fitted with new Michelin summer tyres in sizes 245/45 R20 and 285/40 R20, which ensure excellent traction and outstanding performance in warm weather conditions. These tyres not only offer a high level of comfort and excellent grip on dry and wet surfaces, but also improved fuel efficiency and reduced noise, making them the ideal choice for your Taycan.

In addition, the wheels are equipped with TPMS sensors that continuously monitor tyre pressure and contribute to safety by informing the driver when tyre pressure falls below the recommended level. The rims and tyres are marked as "used" but are in like-new condition with low mileage and minimal signs of use or storage. The tyres are factory new (0 km mileage), giving you the assurance that you are purchasing a product of the highest quality and reliability. The OEM number for this set is 9J1073650J, which confirms that these are genuine Porsche parts. This ensures seamless compatibility with your Porsche Taycan and compliance with Porsche's high quality standards.

This wheel set is not only a practical choice for the summer months, but also an aesthetic upgrade for your vehicle, emphasising its character and uniqueness.

## Technical specifications
