Price:	1.126,99 € (nett:947,05 €)

Product description

The dual-mass flywheel for the Porsche Panamera model 971 with a 2.9-litre engine is an essential component of the powertrain, designed to reduce vibrations and noise generated during engine operation. This specific flywheel helps to minimise the transmission of torsional vibrations between the engine and the gearbox, resulting in a smoother and more comfortable driving experience.

The dual-mass flywheel offered here bears the OEM number 9A710526410 and comes from a used Porsche Panamera of the 971 model series. Despite being second-hand, it is in very good condition and undamaged. It is a genuine Porsche part, which guarantees high quality and a precise fit.

This dual-mass flywheel is ideal for owners of a Porsche Panamera 971 who require a replacement part that maintains their vehicle's performance and comfort. It offers a cost-effective solution to extend the vehicle's service life and preserve the performance of the powertrain.
