Discount:	85%
Available:	ready for shipping
Price:	8.792,64 € (nett:7.388,77 €)

Product description

The boot lid or front lid for the Porsche 911 model 991, specifically for the GT2 RS variant, is made of high-quality carbon and coated with a clear lacquer for additional protection and shine. This spare part is not only functional but also aesthetically pleasing, as it emphasises the sporty appearance of the vehicle.

The bonnet is equipped with integrated air intakes that allow for improved air circulation and thus contribute to cooling the vehicle. This is particularly important for high-performance models such as the GT2 RS, where optimal engine and brake cooling is crucial for performance.

The OEM number for this specific part is 99151191181KPL, which ensures compatibility with the Porsche 911 model 991. It is an original Porsche part, which means that it meets the manufacturer's strict quality standards and guarantees a perfect fit.

The boot lid is new or like new, as it was removed from a new car with low mileage. It is in very good condition with minimal signs of use or storage, making it an excellent choice for those looking to restore their vehicle or simply replace a damaged or worn part.

In summary, the carbon boot lid/front lid for the Porsche 911 991 GT2 RS is an excellent choice for vehicle owners who value quality, performance and aesthetics.
