<b>Price:</b>	<b>1.849,91 €</b> <b>(nett:1.554,55 €)</b>

### Product description

This hydraulic unit for the Porsche Cayenne model 9Y0 (from 2018 onwards) is an essential component for the brake system and the adaptive driver assistance system with Stop & Go function. It is a new, unused and undamaged original Porsche part that has been specially developed for the highest performance requirements and reliability.

The hydraulic unit is central to the ABS (anti-lock braking system), which increases control of the vehicle during braking manoeuvres and prevents the wheels from locking. The integration of the adaptive driver assistance system enables a comfortable and safe journey by automatically adjusting the speed of the vehicle to the traffic and, if necessary, braking the vehicle to a standstill.

The OEM numbers for this specific part are 9Y0614508PY, 9Y0614508LY, 9Y0614508HY, 9Y0614508BY, 9Y0614508Y and 9Y0614508AY, ensuring compatibility and interchangeability with various versions of the Porsche Cayenne E3/9Y0. This high-quality replacement part is ideal for Porsche Cayenne owners who value original parts to ensure the optimal functionality and performance of their vehicle. It not only supports safety through the improved braking system, but also driving comfort through the adaptive driving functions.
